KGMM

PRACTICE BRIEF

STRATEGIC ADVISORY & EXECUTION

Technology & Cloud

Infrastructure, data, and automation designed to make your technology work harder for the business.

THE BUSINESS CHALLENGE

Fragmented platforms, manual processes, and unclear ownership limit the value of technology. Modernization needs to address business outcomes alongside cost, resilience, security, and delivery constraints.

OUR APPROACH

Define the operating need and desired outcome. Assess options and dependencies, establish ownership and controls, and sequence implementation into manageable stages.

SERVICES IN THIS PRACTICE

Digital Transformation

Translate business priorities into coordinated process, technology, and organizational change.

Cloud Infrastructure

Plan architecture, migration, operations, resilience, and cost visibility.

Data & Analytics Lakehouse

Connect data architecture to decisions, quality, ownership, and access boundaries.

Intelligent Automation

Improve workflows with clear exception handling, ownership, and controls.

IT Service Desk Solutions

Define service ownership and a consistent path from request to resolution.

Data Privacy Engineering

Translate privacy requirements into collection, access, retention, and design decisions.

Dedicated Internet Access

Evaluate connectivity requirements, service options, resilience, and delivery dependencies.

TYPICAL ENGAGEMENT OUTPUTS

- Business-aligned technology roadmap
- Architecture and migration decisions
- Service workflows and operating ownership
- Implementation priorities and acceptance criteria
